PROJECTS

Job Portal Application (Full Stack) | Java, Spring Boot, Spring Data JPA, Hibernate, React, MySQL

- Designed and deployed a full-stack job portal with user registration, login, job posting and application tracking.
- Built RESTful APIs in Spring Boot following MVC and microservice principles, with CRUD operations persisted to MySQL.
- Integrated secure authentication across the React front end and backend services; improved UI responsiveness, raising user engagement by 30%.

Visual AI Pipeline Builder | React, React Flow, Zustand, FastAPI, Python

- Built a drag-and-drop workflow builder that lets users design and connect Generative AI pipelines without writing code.
- Developed a backend that validates pipelines as Directed Acyclic Graphs (DAG) and exposes node and edge metrics through REST APIs.

Aroma Hotel Website | HTML5, CSS3, JavaScript

- Developed a responsive hospitality website with interactive components and dynamic animations.
